

Monthly Updates

From novelties in our sales, hardware, and low-voltage businesses to inside news on our internal operations, Kambrian aims to keep customers informed. Keep reading to get the latest scoop.

COMPANY NEWS:

Kambrian Corporation recently celebrated our 10 year anniversary among colleagues and friends, enjoying a wonderfully sunny day filled with great food and kayaking in Costa Mesa. Kambrian is grateful for having a dedicated team of low-voltage engineers and a technically trained in-house staff to provide customers with quality services and care. We are fortunate to be surrounded by a group of people who not only work well together but who have also actively contributed to Kambrian's great culture throughout the years. We feel energized reaching this milestone in the Kambrian timeline and are determined to achieve 10 more years!

Please view the YouTube link provided below to watch a brief video of Kambrian's 10 year celebration!

LOW-VOLTAGE:

On the low-voltage side, Kambrian Corporation is excited about our recent project, assisting with the installation of 5G towers at the Los Angeles Convention center. Kambrian is subcontracting this project under Caltek, which has worked with us on various projects in the past. Installations towards this project started out early August and we have already made strides. We're excited about our current progress and to be involved in similar projects moving forward.

LOCAL GOVERNMENT:

As of summer of 2019 we have been actively accepting quote requests from our customer the Los Angeles World Airports, upon winning our first three-year bid early this year. We're excited to announce that this August we received our first order from LAWA. We're looking forward to continue building upon this relationship with the LAWA procurement team and to work together in determining IT specifications for their needs.

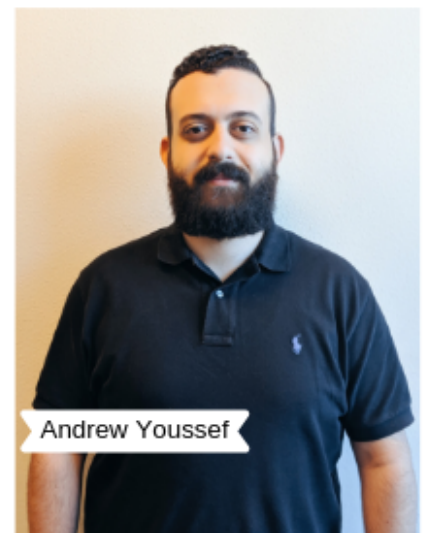

IT NEWS:

Introducing the Samsung FLIP

Samsung's Digital Flip Chart is a great way to drive collaboration and expand presentation capabilities. Weigh your options and request a quote today!
